- . **Smog Regulations**
- . **Trans-Canada Pipeline**
- . **Mountain Top Removal**
- . **Fracking**
- . **Climate Change**
- . **Nuclear Power Plants**
- . **Genetically Engineered Foods**
- . **End Green Climes**
- . **Vanadium Poisoning**
- . **Whistleblower Retaliation**

ASTHMA makes breathing difficult for more than 34 million Americans. Common symptoms include coughing, wheezing, and chest tightness; called bronchial asthma or reactive airway disease. Asthma in children is on the rise.....

GENETICALLY-ENGINEERED FOODS are widespread in the U.S for crops of corn, cotton and soybean since 1996—corporations using marketing strategy to gain acceptance worldwide....

Killing Us and Our Children!!

SMOG is a serious problem that continues to harm human health. Ground-level ozone, sulfur dioxide, nitrogen dioxide and carbon monoxide are especially harmful for senior citizens, children, and people with heart and lung conditions such as emphysema, bronchitis, and asthma. It can inflame breathing passages, decrease the lungs' working capacity, cause shortness of breath, pain when inhaling deeply, wheezing, and coughing.....

Destroying Our Land!!

HYDRAULIC FRACKING is the propagation of fractures in a rock layer caused by the presence of a pressurized fluid; it is one means by which gas and petroleum from source rocks may migrate to reservoir rocks. Over the life of a typical well, this may amount to 100,000 gallons of chemical additives. These additives include biocides, surfactants, viscosity-modifiers, and emulsifiers.....

Destroying Whistleblowers!!

Join Us on March 30, 2012 and Volunteer by Calling 240-731-9577 or 410-591-0892

NUCLEAR POWER PLANTS are thermal power stations in which the heat source is one or more nuclear reactors. The heat is used to generate steam that

drives a steam turbine that produces electricity. Operating nuclear reactors contain large amounts of radioactive fission products that if dispersed can pose a direct radiation hazard, contaminate soil and vegetation, and be ingested by humans and animals. Human exposure at high enough levels can cause both short-term illness and death

VANDADIUM POISONING in humans, poisoning is usually by inhalation causing respiratory irritation and pneumonia. In livestock, poisoning is by ingestion of contaminated pasture and manifested by diarrhea and in coordination.
